Graduate Outcomes Explained

The Workforce Investment Act provided the impetus for the Graduate Outcomes project to develop a system of consumer information. It is a collaborative effort among the Nebraska Department of Labor, the Coordinating Commission for Postsecondary Education, all six of Nebraska's Community Colleges, all three State Colleges and the University of Nebraska – Kearney.

Who uses Graduate Outcomes information?

Prospective students planning their education need information to help select a college and major. Colleges and regulatory commissions need the information to improve educational programs in the state. Workforce Investment Boards, economic developers, and policy makers need information on labor supply to help meet the needs of businesses in Nebraska.

What does the Graduate Outcomes project tell me?

Results from the Graduate Outcomes project give a clearer picture of recent graduates' work location, earnings, and industry employment. Here are just a few examples of questions the Graduate Outcomes project can help answer:

- In which counties are graduates employed?
- What are the demographic characteristics of graduates?
- What industries employ recent graduates?
- Which fields of study produce graduates most likely to be employed in Nebraska?
- Which fields of study produce graduates with the highest wages?
- What are some characteristics of the businesses employing these recent graduates?

The Appendix of this publication contains detailed spreadsheets for participating institutions that include the percentage of graduates working in Nebraska plus earnings by field of study and degree. It also includes industry employment by major and degree along with earnings information.

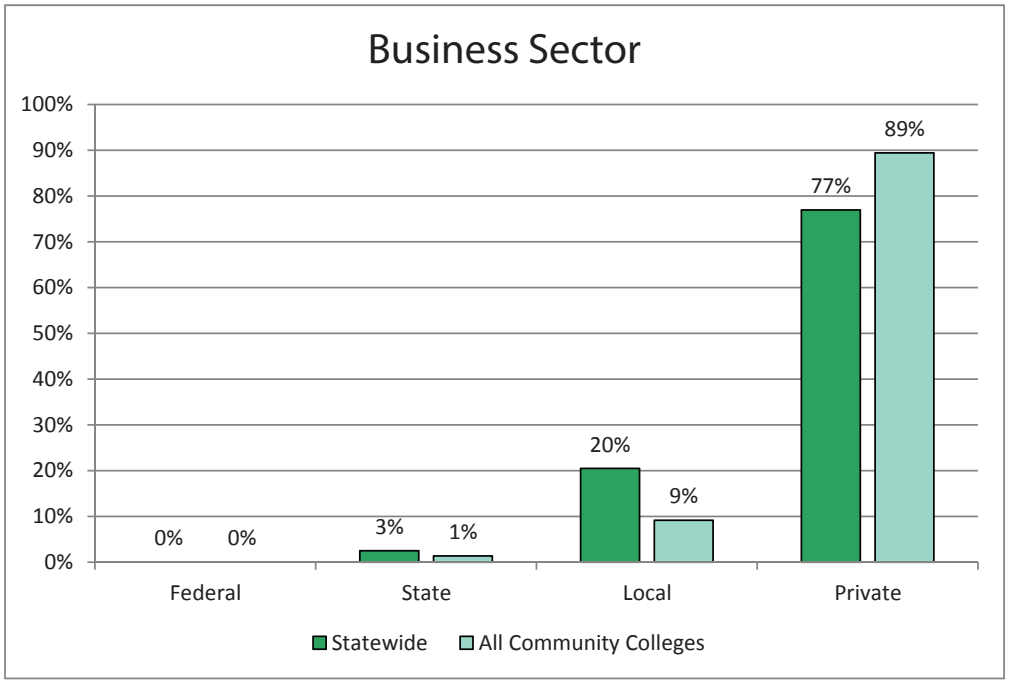
- The highest paid race/ethnicity with an associate's degree were Asians, with a median annual wage of $27,071.
- On average, female community college graduates with associate's degrees earned only 87.3% of the wage of their male counterparts.
- 9.7% of all community college graduates were minorities. While 74% of white graduates were found working in Nebraska, only 67% of minority students were employed in Nebraska.
- Associates degree holders earned the highest median annual wage, at $22,678, while 1 and 2 year award holders earned $22,135, and less than 1 year award holders earned only $19,751.

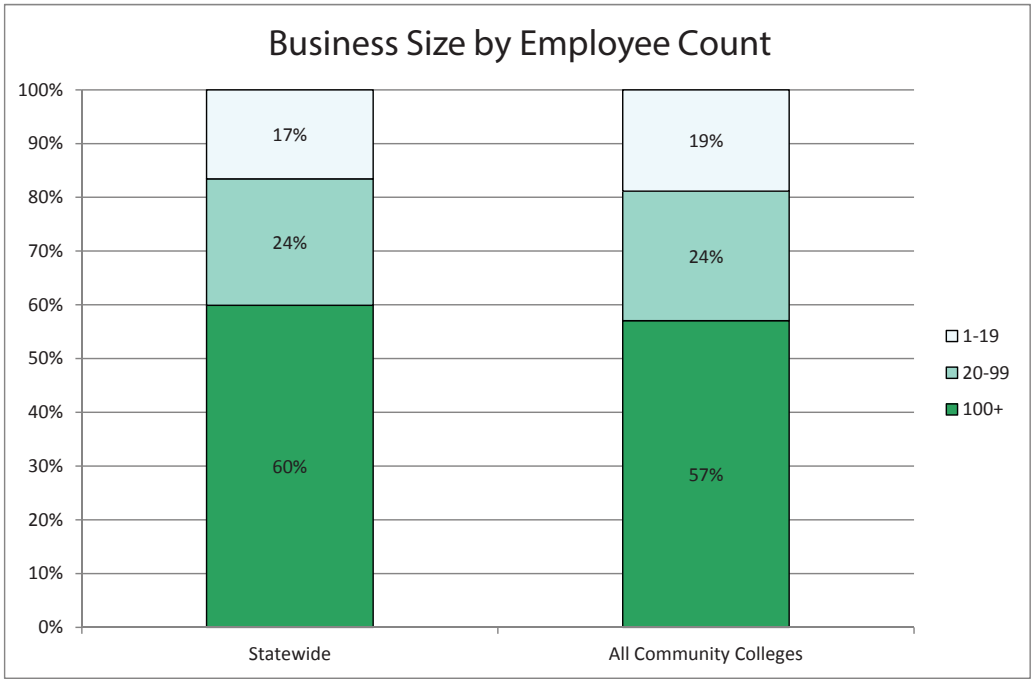
All Community Colleges • Industry Anaylsis

Employing Industry	Number of Graduates Working in Nebraska	Estimated Average Annual Earnings
Accommodation and Food Services	43	$12,884
Administrative and Support and Waste Management and Remediation Services	177	$17,607
Agriculture, Forestry, Fishing & Hunting	55	$20,503
Arts, Entertainment, and Recreation	28	$15,713
Construction	205	$24,682
Educational Services	159	$17,887
Finance and Insurance	187	$26,652
Health Care	1039	$27,175
Information	57	$32,183
Leisure and Hospitality	219	$12,477
Management of Companies and Enterprises	13	$29,852
Manufacturing	384	$34,833
Other Services, Except Public Administration	128	$19,970
Professional, Scientific, and Technical Services	146	$24,851
Public Administration	111	$25,798
Real Estate and Rental and Leasing	26	$16,790
Retail Trade	507	$16,956
Social Assistance	116	$15,167
Transportation and Warehousing	80	$25,774
Utilities	48	$44,464
Wholesale Trade	221	$25,036

- 26.3% of all community college graduates that were working in Nebraska were working in the health care industry. 12.8% were working in retail trade, and 9.7% were working in manufacturing.
- Of all the graduates working in the healthcare industry, 43.5% were nurses (either LPNs or RNs).
- The most popular field of study for all community college graduates working in Nebraska was Liberal Arts (11.2%), followed by Business Administration and Management (7.6%) and Licensed Practical Nurse (7.2%).
- Community College graduates with Liberal Arts degrees most commonly worked in the Retail Trade industry. The estimated average annual income of all liberal arts degree holders was $15,667.

All Community Colleges • Sector/Business Size Analysis





- Compared to the statewide average, community college graduates were more likely to work in the private sector (89% vs. 77%).
- Community college graduates were also more likely to be found working for smaller businesses (between 1 and 19 employees) than all graduates as a whole.
- 63% of Business administration and management degree holders worked for businesses that employed more than 100 people. 71% of graduates that studied dental assisting or dental hygiene worked for businesses that employed less than twenty people.
- Only 33% of graduates working in the private sector earned more than $28,500, compared to 42% of state and local government employees.
- Overall, recent Community College Graduates were more likely to find themselves working in the private sector than the average Nebraska worker was. This outcome reflects the skills-based and career-oriented training focus of many community college programs.

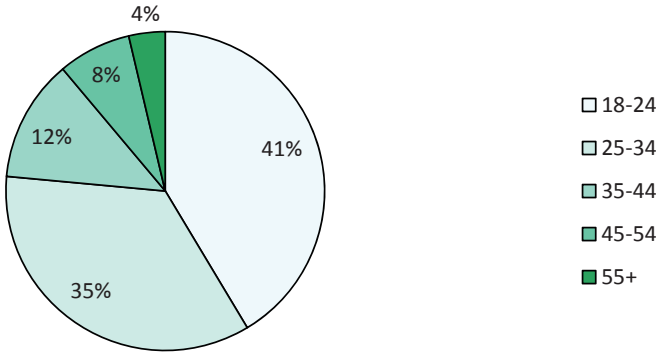
Other Services, Except Public Administration	73	Professional, Scientific, and Technical Services	61	Professional, Scientific, and Technical Services	23	Wholesale Trade	13	Transportation and Warehousing	7

Percentage Graduates by Age



- Recent Community College graduates found themselves slightly less likely to work for the State's largest businesses and slightly more likely to work for its smallest than did the average employed Nebraskan. The recent Community College graduates were exactly as likely to work in the middle category; businesses employing 20-99 people.
- The lack of federal institutions providing any significant number of jobs in Nebraska keeps the number of recent graduates of Community Colleges, recent graduates of State Colleges and Nebraska workers in general quite low. Federal government employment makes up a negligible portion of total employment in each category.

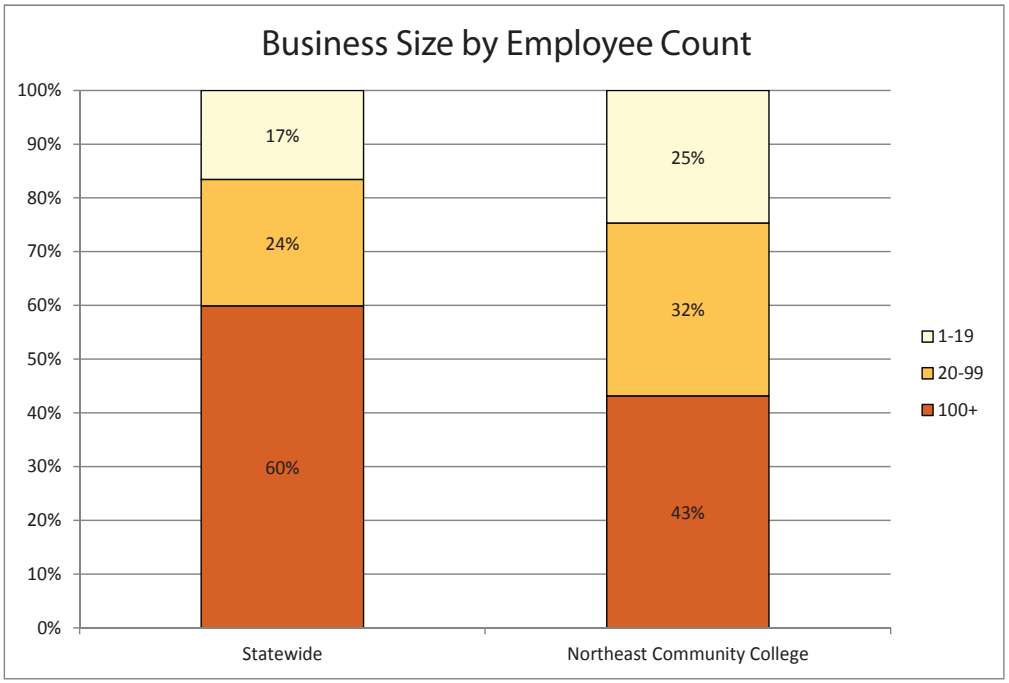
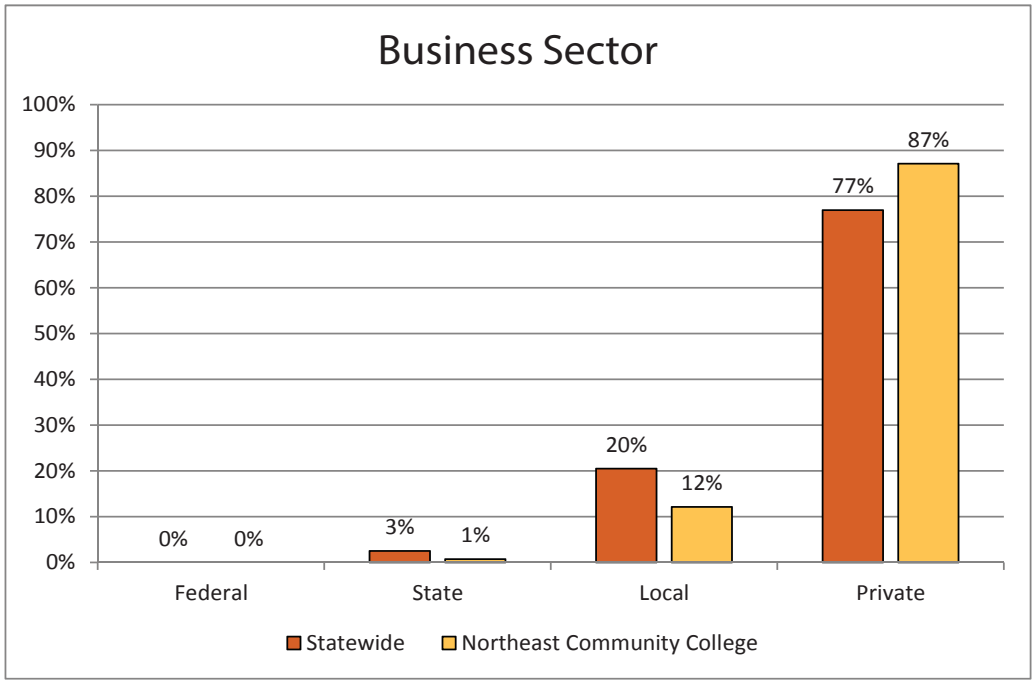
Wholesale Trade	47	$20,960

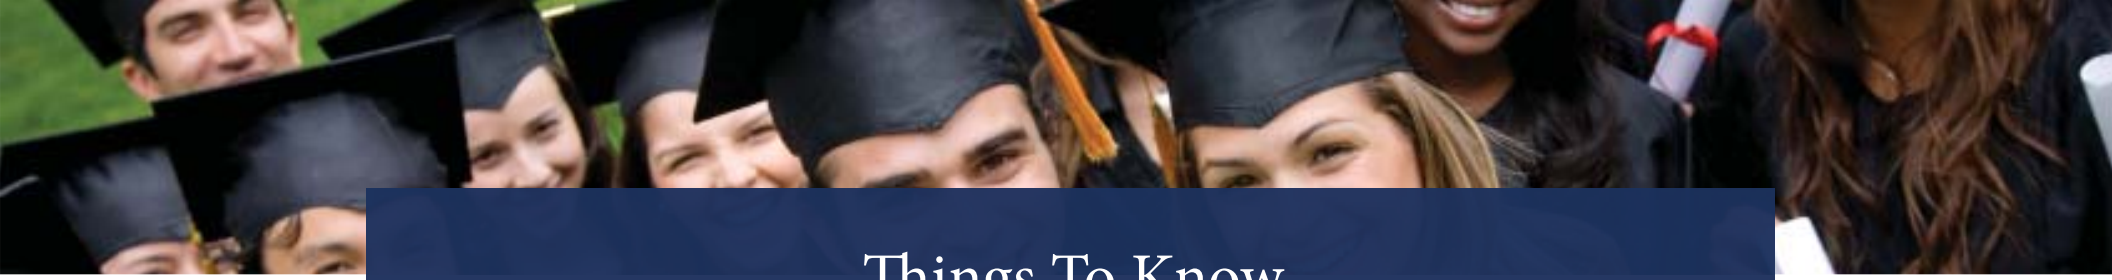
- The largest industry for Northeast graduates was Health Care, with 22% of graduates working in Nebraska employed in the industry.
- 84% of graduates employed in the Health Care industry majored in Health Care related fields.
- The most lucrative industry for Northeast graduates was Utilities, with estimated average annual earnings of $44,781.
- 100% of graduates employed in Construction were male.
- Only 11% of graduates working in Educational Services majored in an education field.
- 82% of graduates working in Public Administration were under 30.
- 92% of graduates working in Retail Trade were under 30.
- 100% of graduates working in Social Assistance were under 30.

Northeast Community College • Sector/Business Size Anaylsis





- 87.1% of Northeast Community College graduates worked for private companies. 26.6% of private company employees earned more than $28,500 per year. Only 12.1% of Northeast graduates worked for local governments, but of those that did, 47.7% earned more than $28,500 per year.
- 52.6% of graduates working at large companies earned more than $28,500 per year.
- Graduates working for private industry were split fairly evenly among small, medium and large companies. 40.2% worked for large companies, while 31.8% worked for medium sized companies, and 28.0% worked for small companies.
- 58.8% of all Northeast graduates found working in Nebraska were under the age of 25. The majority of graduates under the age of 25 were found working for businesses with more than 100 employees.
- 60% of graduates working for private companies were under the age of 25.



Things To Know

Annualized wage records are found by taking the graduate's first quarter earnings multiplied by four. This is the same methodology used to estimate the service area earnings, using Quarterly Census of Employment and Wages data.

When there are small numbers of students in a program/major/industry, a few unusual results can dramatically affect percentages. To protect individual confidentiality, programs with fewer than four graduates will not be published. Non-publishable or unavailable data is denoted as "****" or "na" throughout the publication.

Wage matches are postponed to give graduates time to be working in a career field. There is also a lag time in obtaining unemployment insurance records. In general, for people working January through March, employers have approximately April through June to report the information. The Quarterly Census of Employment and Wage information is added July through September. Past experience tells us that if the queries are run at a later date, more employment is reported, allowing for more accurate and complete data.

Not all graduates can be found. If a graduate is not found it does not necessarily mean they are unemployed; it means they were not located in the search of Nebraska's Unemployment Insurance database. Individuals who are self-employed, work in occupations not covered by Unemployment Insurance, are enrolled in other postsecondary education and are not working, or work in another state are unlikely to be found in the database. An institution's proximity to bordering states may make some students less likely to be employed in Nebraska, and therefore, not found in Nebraska's Unemployment Insurance database.

Earnings may be for full- or part-time work. Earnings reported in the database include wages, salaries, bonuses, commissions and other income designated as earnings under Nebraska Unemployment law. Wages tend to be higher in some regions than others. The wage information listed relates to all individuals found working in Nebraska and may be influenced by strong regional variation.

It is not possible to tell if graduates are employed in occupations related to their education.

The CIP Code field identifies the six digit classification of instructional program (CIP) code for each field of study.

Data pertaining to the University of Nebraska-Lincoln and University of Nebraska-Omaha was not made available to the Department of Labor for this publication.
