APPENDIX 19

OVERVIEW

GRADUATE OUTCOMES EXPLAINED

The Workforce Investment Act provided the impetus for the Graduate Outcomes project to develop a system of consumer information. This collaborative effort involves the Nebraska Department of Labor, the Coordinating Commission for Postsecondary Education, all six of Nebraska's community colleges, all three state colleges and the University of Nebraska – Kearney.

WHO USES GRADUATE OUTCOMES INFORMATION?

Prospective students planning their education need information to help select a college and major. Colleges and regulatory commissions need the information to improve educational programs in the state. Workforce Investment Boards, economic developers, and policy makers need information on labor supply to help meet the needs of businesses in Nebraska.

WHAT DOES THE GRADUATE OUTCOMES PROJECT TELL ME?

Results from the Graduate Outcomes project give a clear picture of recent graduates' work location, earnings, and industry employment.

HERE ARE JUST A FEW EXAMPLES OF QUESTIONS THE GRADUATE OUTCOMES PROJECT CAN HELP ANSWER:

- In which counties are graduates employed?
- What are the demographic characteristics of graduates?
- What industries employ recent graduates?
- Which fields of study produce graduates most likely to be employed in Nebraska?
- Which fields of study produce graduates with the highest wages?
- What are some characteristics of the businesses employing these recent graduates?

The Appendix of this publication contains detailed spreadsheets for participating institutions that include the percentage of graduates working in Nebraska plus earnings by field of study and degree. It also includes industry employment by major and degree along with earnings information.

THINGS TO KNOW

Annualized wage records are found by taking the graduate's first quarter earnings multiplied by four. This is the same methodology used to estimate the service area earnings, using Quarterly Census of Employment and Wages data.

When there are small numbers of students in a program/major/industry, a few unusual results can dramatically affect percentages. To protect individual confidentiality, programs with fewer than four graduates are not published. Non-publishable or unavailable data is denoted as "***" or "na" throughout the publication.

Wage matches are postponed to give graduates time to be working in a career field. There is also a lag time in obtaining unemployment insurance records. In general, for people working January through March, employers have approximately April through June to report the information.

The Quarterly Census of Employment and Wage information is added July through September. Past experience tells us that if the queries are run at a later date, more employment is reported, allowing for more accurate and complete data.

Not all graduates can be found. If a graduate is not found, it does not necessarily mean they are unemployed; it means they were not located in the search of Nebraska's Unemployment Insurance database. Individuals who are self-employed, work in industries not covered by Unemployment Insurance, are enrolled in other postsecondary education and are not working, work in another state, or work for the federal government are unlikely to be found in the database. An institution's proximity to bordering states may make some students less likely to be employed in Nebraska, and therefore, not found in Nebraska's Unemployment Insurance database.

Earnings may be for full or part-time work. Earnings reported in the database include wages, salaries, bonuses, commissions and other income designated as earnings under Nebraska Unemployment law. Wages tend to be higher in some regions than others. The wage information listed relates to all individuals found working in Nebraska and may be influenced by strong regional variation.

It is not possible to tell if graduates are employed in occupations related to their education.

The CIP Code field identifies the six digit classification of instructional program (CIP) code for each field of study.

Data pertaining to the University of Nebraska-Lincoln and University of Nebraska-Omaha was not made available to the Nebraska Department of Labor for this publication.

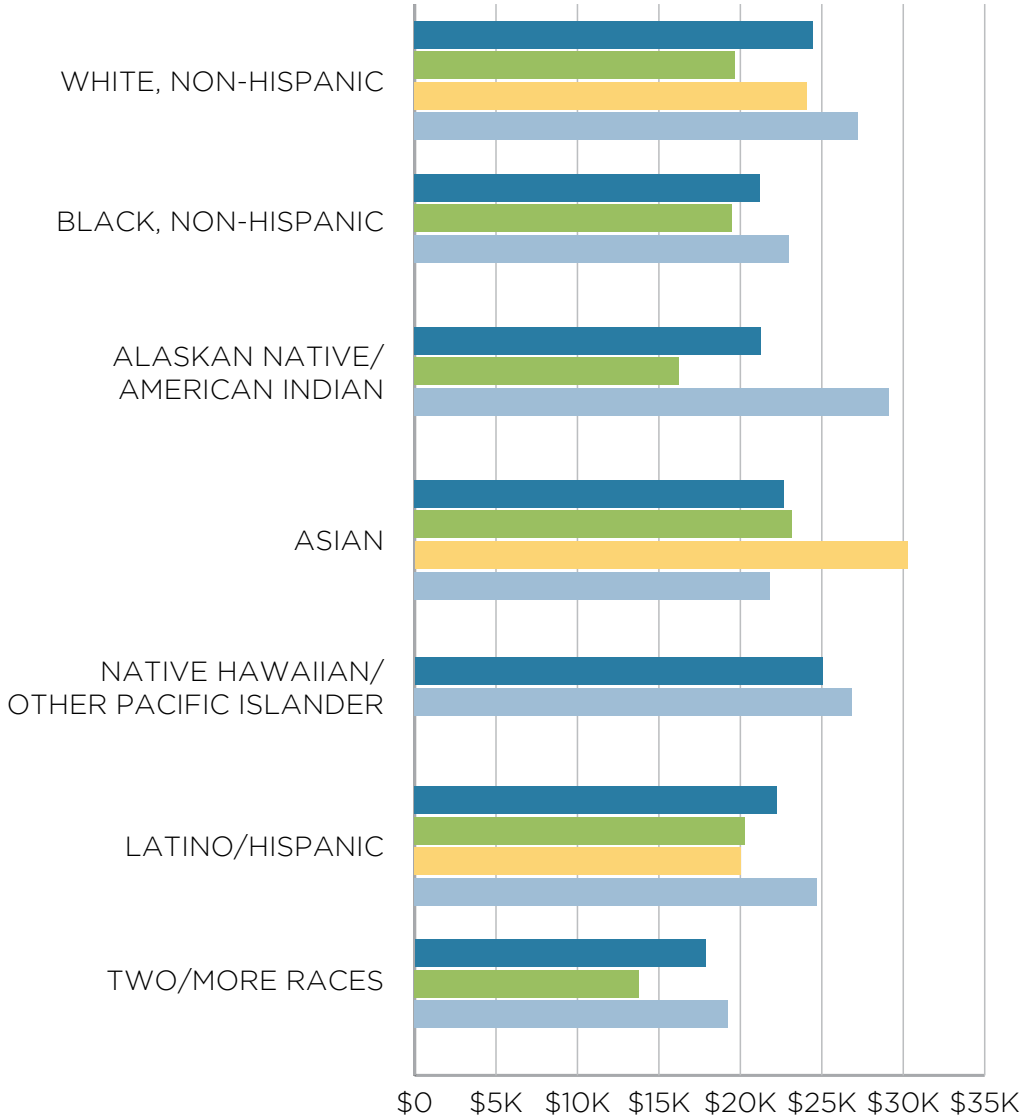
DEMOGRAPHIC
ANALYSIS

ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL



For complete breakdown of graph data, see the table on the previous page.

There were 8,180 graduates from all six of Nebraska's community colleges in the 2011-12 academic year. Of these graduates, 57.4% were female. White, non-Hispanics made up 82.0% of graduates, and 15.5% were a minority. Of these, 6.1% were black, non-Hispanic, 2.0% were Asian, and 5.7% were Hispanic or Latino.

Almost three-fourths (74%) of all 2011-12 community college graduates were working in Nebraska in the first quarter of 2013. The estimated annual average wage for all graduates working in Nebraska was $24,063. The highest estimated annual average wage was earned by associate degree holders, who earned an average of $26,777.

If a color is not displayed on the graph, the data was not available for that race/ethnicity and degree level.

INDUSTRY

ANALYSIS

Most community college graduates working in Nebraska were found in the health care industry. The top three industries graduates were working in were health care (29.5%), retail trade (12.8%), and manufacturing (8.1%). These three industries accounted for just over half of all the community college graduates working in Nebraska.

Of all the graduates working in the health care industry, 26.8% were nurses (either LPNs or RNs). Another 26% were Emergency Medical Technicians or paramedics. There were 1,120 EMTs and paramedics found working in Nebraska, but only 41.4% worked in the health care industry. The others were found working in every industry except agriculture and mining.

Liberal arts graduates were also found to be working in every industry except mining. The most common industry for liberal arts graduates was retail trade, with 20.8% of liberal arts graduates working in that industry.

EMPLOYING INDUSTRY	GRADUATES WORKING IN NEBRASKA	ESTIMATED AVG. ANNUAL EARNINGS

BUSINESS SECTOR & SIZE

ANALYSIS

GRADUATE EMPLOYMENT PERCENTAGE BY BUSINESS SECTOR

	FEDERAL	%	STATE	%	LOCAL	%	PRIVATE	%	TOTAL
Statewide	N/A	0%	234	3%	1382	18%	6142	79%	7758
All Community Colleges	N/A	0%	140	2%	567	9%	5344	88%	6051

BUSINESS SIZE BY EMPLOYEE COUNT

	1 - 19	%	20 - 99	%	100+	%	TOTAL
Statewide	1195	15%	1927	25%	4636	60%	7758
All Community Colleges	1004	17%	1486	25%	3561	59%	6051

Compared to the statewide average, community college graduates were more likely to work in the private sector (88% vs. 79%). This outcome may reflect the skills-based and career-oriented training focus of many community college programs. Community college graduates were also slightly more likely to be found working for smaller businesses (between 1 and 19 employees) than all graduates as a whole. Among business administration and management degree holders, 62.4% worked for businesses that employed more than 100 people. Among graduates who studied dental assisting or dental hygiene, 71.4% worked for businesses who employed less than 20 people. Only 33.4% of graduates working in the private sector earned more than $28,500, compared to 41.2% of state and local government employees.

AGE
ANALYSIS

The most common industry of employment across all age groups was health care. Most recent community college graduates are young. Seventy-four percent of community college graduates were between the ages of 18 and 34, which was similar to the statewide percentage. However, the distribution is slightly different. Community college graduates tend to be slightly younger. Thirty-five percent of community college graduates were between 18 and 24, while only 28% of graduates statewide fell into the same age category.

The most popular field of study for all community college graduates was Emergency Medical Technology. Seventy-six percent of the graduates in that field were between the ages of 18 and 34. It was also the most popular field of study for graduates over the age of 55, at 16.3%, followed by business administration and management (12.2%) and truck and bus driver/commercial vehicle operator (8.1%).

DEMOGRAPHIC
ANALYSIS

Most graduates (71.5%) from Mid-Plains Community College (MPCC) graduated with associate degrees. Mid-Plains graduates with a less than one year award earned an average annual wage of $16,531. Graduates with a more than one but less than two year award earned an average annual wage of $21,864, while graduates with associate degrees earned $22,904.

Overall, 66% of Mid-Plains graduates were found to be working in Nebraska. Minorities made up 10.1% of Mid-Plains graduates. Fifty-seven percent of Mid-Plains' minority graduates were found to be working in Nebraska.

The highest median annual wage ($22,135) was received by male graduates with associate degrees. The highest average annual wage was received by female graduates with associate degrees. Their average annual wage was $23,294.

Wholesale Trade	66	$26,019

Associate degree holders were most often found working in the health care industry (30.0%), retail trade (20.2%), and construction industry (6.9%). Mid-Plains graduates working in the manufacturing industry earned the highest average annual wage at $39,341. Fifty-seven percent of graduates working in retail trade majored in liberal arts and sciences/liberal studies Among graduates in the health care industry, 81.3% worked for businesses with more than 100 employees.

BUSINESS SECTOR & SIZE

ANALYSIS

Of the Mid-Plains graduates working in the private sector, 54.3% of graduates earned less than $20,500 annually and 25.8% earned less than $11,500 per year. Of the graduates working for large businesses (100 employees or more), 40.9% earned more than $28,500 annually. This compares with 16.1% of graduates working at medium sized businesses (20 to 99 employees) and 17.5% of graduates working in a small business (19 employees or less). Among private sector graduates, 47.4% of those who worked for private businesses worked at businesses that employed more than 100 people.
