## GRADUATE OUTCOMES EXPLAINED

The Workforce Investment Act provided the impetus for the Graduate Outcomes project to develop a system of consumer information. This collaborative effort involves the Nebraska Department of Labor, the Coordinating Commission for Postsecondary Education, all six of Nebraska's community colleges, all three state colleges and the University of Nebraska - Kearney.

## WHO USES GRADUATE OUTCOMES INFORMATION?

Prospective students planning their education need information to help select a college and major. Colleges and regulatory commissions need the information to improve educational programs in the state. Workforce Investment Boards, economic developers, and policy makers need information on labor supply to help meet the needs of businesses in Nebraska.

## WHAT DOES THE GRADUATE OUTCOMES PROJECT TELL ME?

Results from the Graduate Outcomes project give a clear picture of recent graduates' work location, earnings, and industry employment.

## HERE ARE JUST A FEW EXAMPLES OF QUESTIONS THE GRADUATE OUTCOMES PROJECT CAN HELP ANSWER:

- In which counties are graduates employed?
- What are the demographic characteristics of graduates?
- What industries employ recent graduates?
- Which fields of study produce graduates most likely to be employed in Nebraska?
- Which fields of study produce graduates with the highest wages?
- What are some characteristics of the businesses employing these recent graduates?

The Appendix of this publication contains detailed spreadsheets for participating institutions that include the percentage of graduates working in Nebraska plus earnings by field of study and degree. It also includes industry employment by major and degree along with earnings information.

## 4 [ THINGS TO KNOW

Annualized wage records are found by taking the graduate's first quarter earnings multiplied by four. This is the same methodology used to estimate the service area earnings, using Quarterly Census of Employment and Wages data.

When there are small numbers of students in a program/major/industry, a few unusual results can dramatically affect percentages. To protect individual confidentiality, programs with fewer than four graduates are not published. Non-publishable or unavailable data is denoted as “\*\*\*” or “na” throughout the publication.

Wage matches are postponed to give graduates time to be working in a career field. There is also a lag time in obtaining unemployment insurance records. In general, for people working January through March, employers have approximately April through June to report the information.

The Quarterly Census of Employment and Wage information is added July through September. Past experience tells us that if the queries are run at a later date, more employment is reported, allowing for more accurate and complete data.

Not all graduates can be found. If a graduate is not found, it does not necessarily mean they are unemployed; it means they were not located in the search of Nebraska's Unemployment Insurance database. Individuals who are self-employed, work in industries not covered by Unemployment Insurance, are enrolled in other postsecondary education and are not working, work in another state, or work for the federal government are unlikely to be found in the database. An institution's proximity to bordering states may make some students less likely to be employed in Nebraska, and therefore, not found in Nebraska's Unemployment Insurance database.

Earnings may be for full or part-time work. Earnings reported in the database include wages, salaries, bonuses, commissions and other income designated as earnings under Nebraska Unemployment law. Wages tend to be higher in some regions than others. The wage information listed relates to all individuals found working in Nebraska and may be influenced by strong regional variation.

It is not possible to tell if graduates are employed in occupations related to their education.

The CIP Code field identifies the six digit classification of instructional program (CIP) code for each field of study.

Data pertaining to the University of Nebraska-Lincoln and University of Nebraska-Omaha was not made available to the Nebraska Department of Labor for this publication.

# DEMOGRAPHIC ANALYSIS

## ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

There were 8,180 graduates from all six of Nebraska’s community colleges in the 2011-12 academic year. Of these graduates, 57.4% were female. White, non-Hispanics made up 82.0% of graduates, and 15.5% were a minority. Of these, 6.1% were black, non-Hispanic, 2.0% were Asian, and 5.7% were Hispanic or Latino.

Almost three-fourths (74%) of all 2011-12 community college graduates were working in Nebraska in the first quarter of 2013. The estimated annual average wage for all graduates working in Nebraska was \$24,063. The highest estimated annual average wage was earned by associate degree holders, who earned an average of \$26,777.

- ALL DEGREE LEVELS
- < 1 YEAR AWARD

If a color is not displayed on the graph, the data was not available for that race/ethnicity and degree level.

For complete breakdown of graph data, see the table on the previous page.

# INDUSTRY

## ANALYSIS

Most community college graduates working in Nebraska were found in the health care industry. The top three industries graduates were working in were health care (29.5%), retail trade (12.8%), and manufacturing (8.1%). These three industries accounted for just over half of all the community college graduates working in Nebraska.

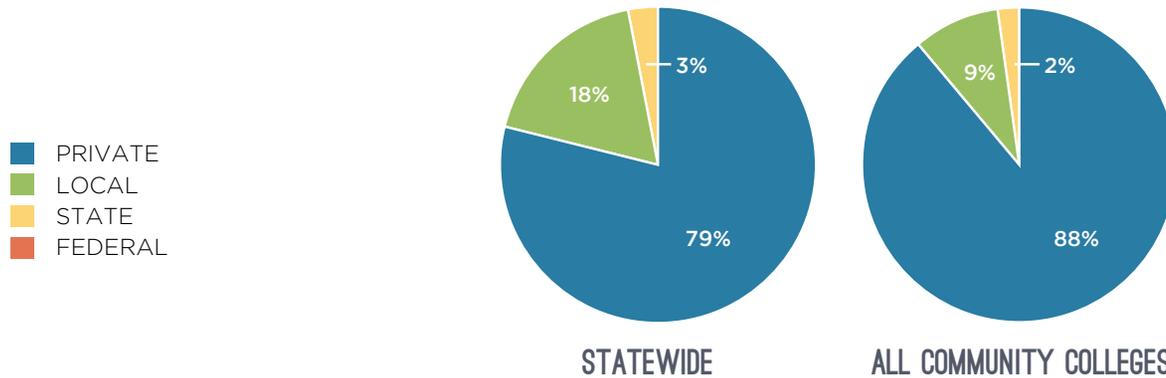

Of all the graduates working in the health care industry, 26.8% were nurses (either LPNs or RNs). Another 26% were Emergency Medical Technicians or paramedics. There were 1,120 EMTs and paramedics found working in Nebraska, but only 41.4% worked in the health care industry. The others were found working in every industry except agriculture and mining.

Liberal arts graduates were also found to be working in every industry except mining. The most common industry for liberal arts graduates was retail trade, with 20.8% of liberal arts graduates working in that industry.

EMPLOYING INDUSTRY	GRADUATES WORKING IN NEBRASKA	ESTIMATED AVG. ANNUAL EARNINGS
Accommodation & Food Services	75	\$13,479

# BUSINESS SECTOR & SIZE ANALYSIS

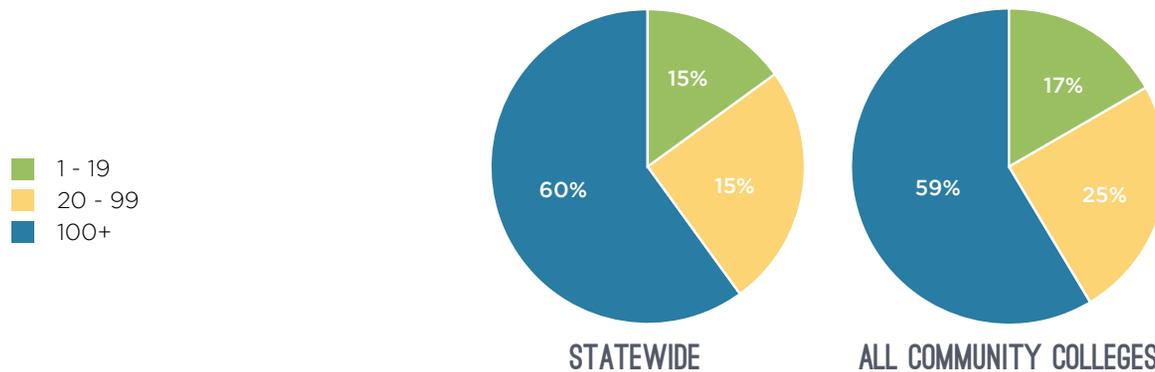

## GRADUATE EMPLOYMENT PERCENTAGE BY BUSINESS SECTOR

	FEDERAL	%	STATE	%	LOCAL	%	PRIVATE	%	TOTAL
Statewide	N/A	0%	234	3%	1382	18%	6142	79%	7758
All Community Colleges	N/A	0%	140	2%	567	9%	5344	88%	6051

Compared to the statewide average, community college graduates were more likely to work in the private sector (88% vs. 79%). This outcome may reflect the skills-based and career-oriented training focus of many community college programs. Community college graduates were also slightly more likely to be found working for smaller businesses (between 1 and 19 employees) than all graduates as a whole. Among business administration and management degree holders, 62.4% worked for businesses that employed more than 100 people. Among graduates who studied dental assisting or dental hygiene, 71.4% worked for businesses who employed less than 20 people. Only 33.4% of graduates working in the private sector earned more than \$28,500, compared to 41.2% of state and local government employees.

## BUSINESS SIZE BY EMPLOYEE COUNT

	1 - 19	%	20 - 99	%	100+	%	TOTAL
Statewide	1195	15%	1927	25%	4636	60%	7758
All Community Colleges	1004	17%	1486	25%	3561	59%	6051

The most common industry of employment across all age groups was health care. Most recent community college graduates are young. Seventy-four percent of community college graduates were between the ages of 18 and 34, which was similar to the statewide percentage. However, the distribution is slightly different. Community college graduates tend to be slightly younger. Thirty-five percent of community college graduates were between 18 and 24, while only 28% of graduates statewide fell into the same age category.

The most popular field of study for all community college graduates was Emergency Medical Technology. Seventy-six percent of the graduates in that field were between the ages of 18 and 34. It was also the most popular field of study for graduates over the age of 55, at 16.3%, followed by business administration and management (12.2%) and truck and bus driver/commercial vehicle operator (8.1%)

# DEMOGRAPHIC ANALYSIS

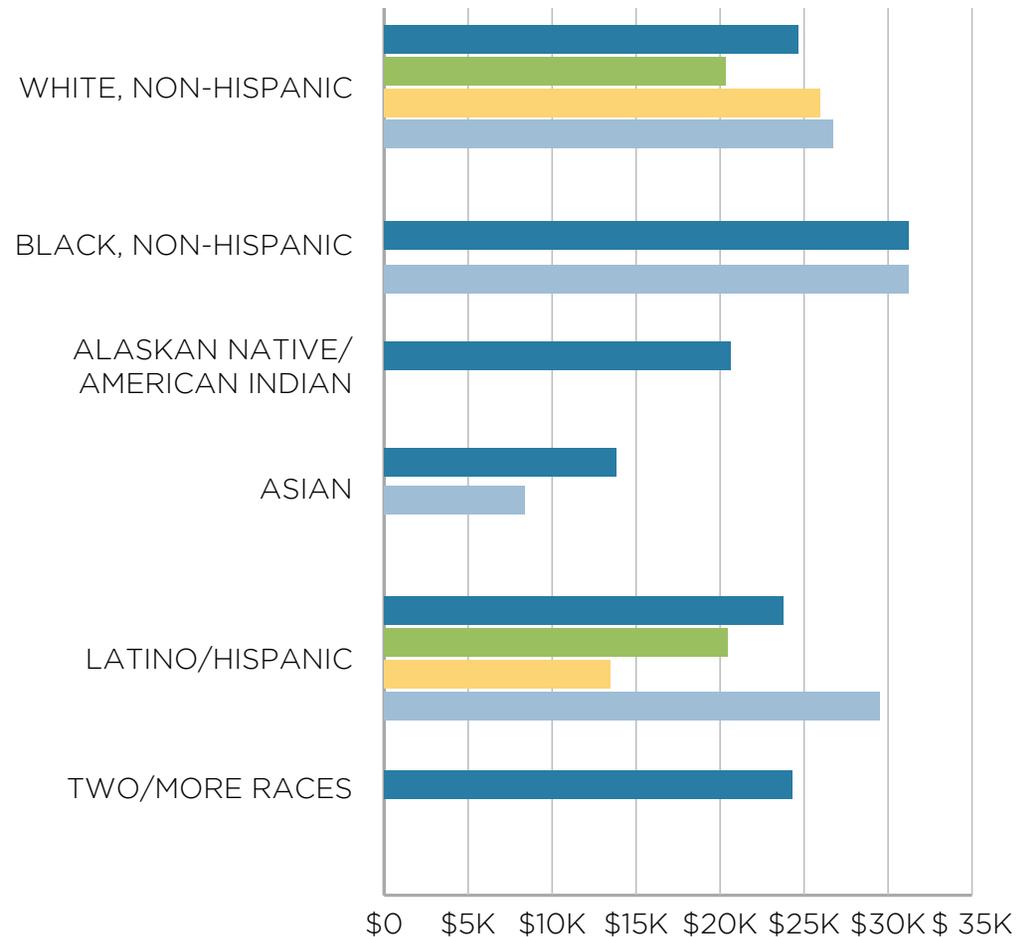

Half of Central Community College's (CCC) graduates earned associate degrees. Graduates with a less than one year award earned an average of \$20,420, while graduates with a between one and two year award earned \$25,481. Associate degree holders earned an average of \$26,688. The highest median annual income was \$29,217, earned by males with associate degrees. The highest average annual income was \$29,486, earned by Hispanic graduates with associate degrees. Forty-three percent of these graduates worked in either the health care, manufacturing, or construction industry.

Overall, 81% of Central graduates were found to be working in Nebraska. The degree level with the highest percentage working in Nebraska was between one and two year awards. Minorities made up only 8.9% of Central graduates.

Social Assistance	31	\$12,814
Transportation & Warehousing	18	\$27,529
Utilities	4	\$41,824
Wholesale Trade	66	\$26,019

The most common industry that Central graduates were found to be working in was health care. The industry that paid the highest average annual wage was utilities, at \$41,824. The highest percentage of less than one year award graduates were employed in the manufacturing industry. The highest percentage of both associate degree graduates and between one and two year award graduates were employed in the health care industry.

# BUSINESS SECTOR & SIZE ANALYSIS

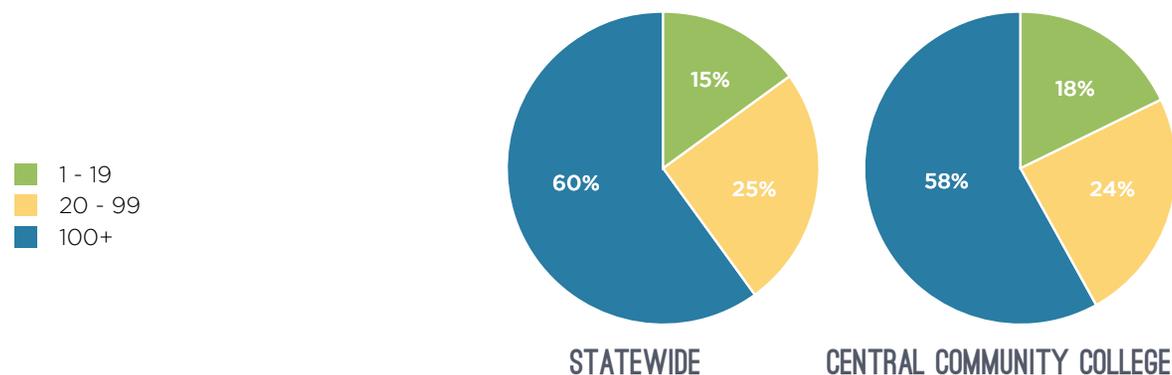

Among Central graduates, 38.2 percent who were working in the private sector earned above \$28,500. A similar wage was earned by 41.7% of Central graduates working in local government and 40.0% of graduates working in state government. Among Central graduates working for companies with more than 100 employees, 45.1% earned \$28,500 or more, while 30.3% at businesses with 20-99 employees earned a similar wage and 29.2% at businesses with less than 20 employees. There were a total of 885 Central graduates who were found working in private business. More than half worked for companies with more than 100 employees.

# AGE ANALYSIS

## GRADUATE PERCENTAGE BY AGE

Among Central graduates working in private business, 47.8% were between the ages of 18 and 24. Their average annual wage was \$19,801. Wages paid to Central graduates increased with age, with 25-34 year-olds earning \$27,759, 35-44 year olds earning \$29,707, and 45-54 year olds earning \$32,894. Central graduates 55 and older earned less, with an average annual wage of \$24,352.

# DEMOGRAPHIC ANALYSIS

## ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

Not quite half (43.3%) of Metropolitan Community College graduates earned associate degrees. Most Metro graduates earned a less than one year award. This is the first year that Metro has had no graduates earn a between one and two year award, as Metro has recently discontinued all educational programs that award between one and two year awards.

- ALL DEGREE LEVELS
- < 1 YEAR AWARD
- BETWEEN 1 & 2 YEAR AWARD
- ASSOCIATE DEGREE

If a color is not displayed on the graph, the data was not available for that race/ethnicity and degree level.

For complete breakdown of graph data, see the table on the previous page.

# INDUSTRY

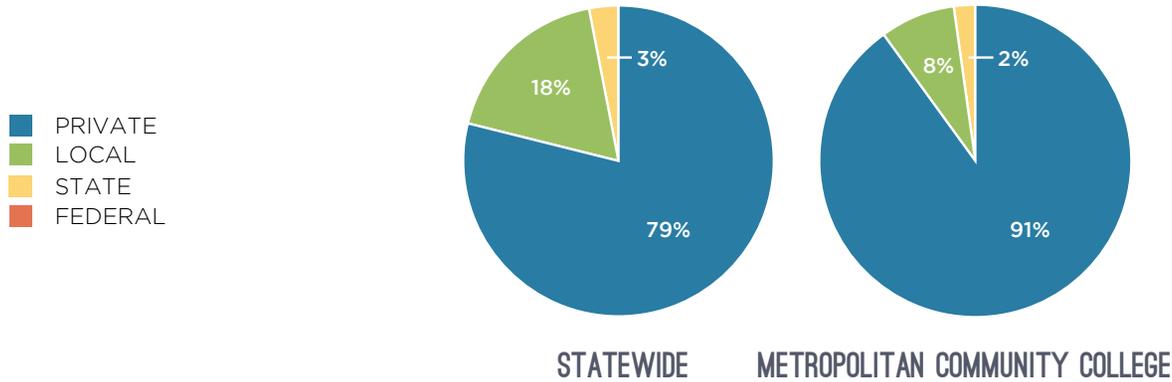

## ANALYSIS

The highest percentage (38.1%) of less than one year award graduates were employed in the health care industry, followed by retail trade (13.4%). The highest percentage (18.6%) of associate's degree graduates were also employed in the health care industry. Most of Metro's female graduates found working in Nebraska (38.9%), were found in the health care industry. Male graduates from Metro were found to be working most often in retail trade (15.5%), health care (13.0%), and manufacturing (8.6%). The highest average annual wage was earned by graduates employed in the utilities industry. Graduates working in the utilities industry earned an average of \$47,346, more than four times the wage earned by graduates in the arts, entertainment, and recreation industry.

# BUSINESS SECTOR & SIZE ANALYSIS

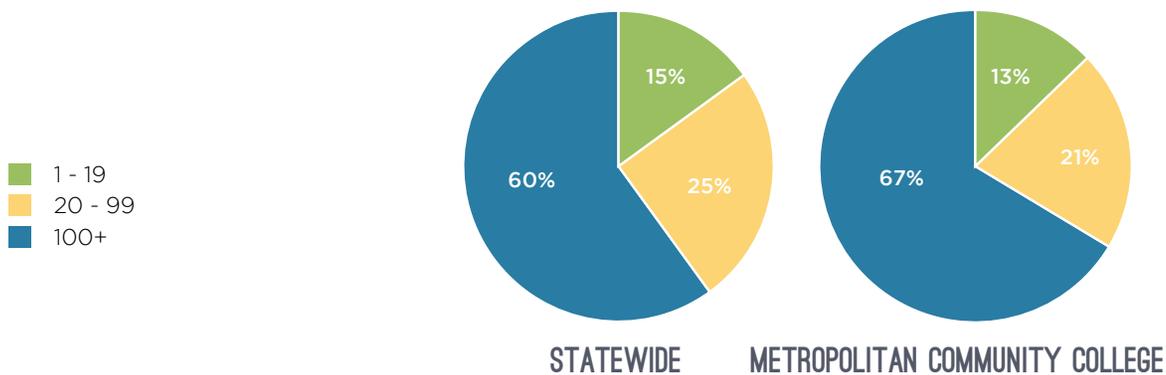

## GRADUATE EMPLOYMENT PERCENTAGE BY BUSINESS SECTOR

Most (29.1%) Metro graduates working in private business in Nebraska earned more than \$28,500. Metro graduates working in state (46.8%) and local (47.2%) government both earned more than \$28,500. The average annual wage earned by Metro graduates working for businesses with fewer than 20 employees was \$19,862. Graduates employed in businesses with 20 to 99 employees earned an average wage of \$21,924, and graduates working for businesses with 100 or more employees earned an average wage of \$24,117.

# AGE ANALYSIS

Most Metro graduates (72.9%) in private businesses were between the ages of 18 and 34. Metro graduates ages 18-24 worked most often in the health care, retail trade, and leisure and hospitality industries. This was also true of graduates ages 25 to 34. Metro graduates ages 35 to 44 worked most often in health care, manufacturing, and leisure and hospitality industries. Graduates ages 45 to 54 worked most often in health care, educational services, and public administration industries. Metro graduates age 55 and over most often worked in health care, administrative and support and waste management and remediation services, and transportation and warehousing industries.

# DEMOGRAPHIC ANALYSIS

Most graduates (71.5%) from Mid-Plains Community College (MPCC) graduated with associate degrees. Mid-Plains graduates with a less than one year award earned an average annual wage of \$16,531. Graduates with a more than one but less than two year award earned an average annual wage of \$21,864, while graduates with associate degrees earned \$22,904.

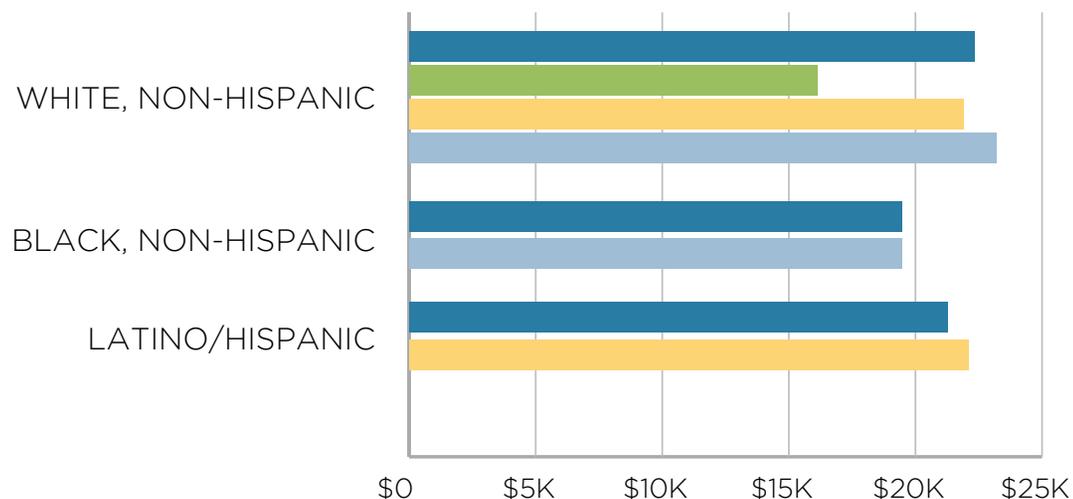

Overall, 66% of Mid-Plains graduates were found to be working in Nebraska. Minorities made up 10.1% of Mid-Plains graduates. Fifty-seven percent of Mid-Plains' minority graduates were found to be working in Nebraska.

The highest median annual wage (\$22,135) was received by male graduates with associate degrees. The highest average annual wage was received by female graduates with associate degrees. Their average annual wage was \$23,294.

Associate degree holders were most often found working in the health care industry (30.0%), retail trade (20.2%), and construction industry (6.9%). Mid-Plains graduates working in the manufacturing industry earned the highest average annual wage at \$39,341. Fifty-seven percent of graduates working in retail trade majored in liberal arts and sciences/liberal studies. Among graduates in the health care industry, 81.3% worked for businesses with more than 100 employees.

# BUSINESS SECTOR & SIZE ANALYSIS

## ANALYSIS

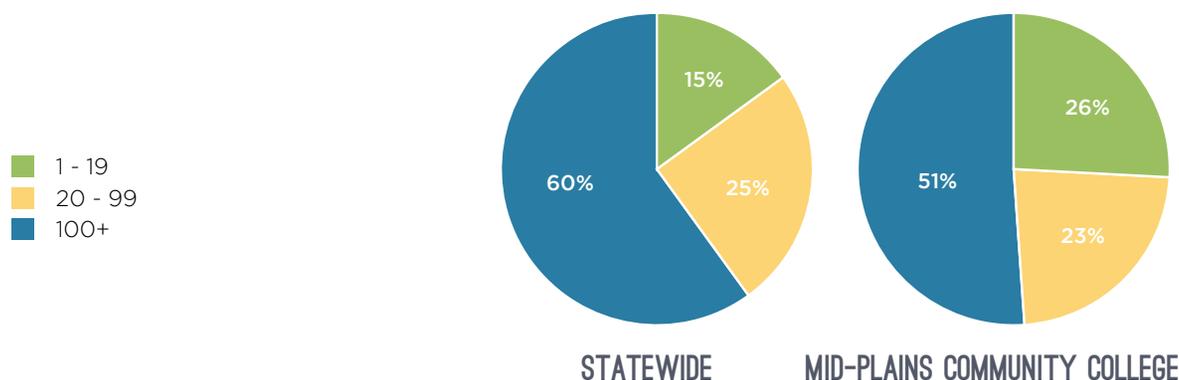

Of the Mid-Plains graduates working in the private sector, 54.3% of graduates earned less than \$20,500 annually and 25.8% earned less than \$11,500 per year. Of the graduates working for large businesses (100 employees or more), 40.9% earned more than \$28,500 annually. This compares with 16.1% of graduates working at medium sized businesses (20 to 99 employees) and 17.5% of graduates working in a small business (19 employees or less). Among private sector graduates, 47.4% of those who worked for private businesses worked at businesses that employed more than 100 people.

# DEMOGRAPHIC ANALYSIS

## ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

The highest median annual wage was earned by male graduates with associate degrees, at \$24,937. White graduates from Northeast (NECC) were found to be working in Nebraska 76% of the time, compared to 53% of minorities. Among graduates with associate degrees, 73.7% were working in 19 different industries. Of the graduates who received a between one and two year award, 36.2% studied licensed practical/vocational nursing.

# INDUSTRY

## ANALYSIS

The largest industry for Northeast graduates was health care, with 39.5% of graduates working in Nebraska employed in the industry, and 91.6% of graduates employed in the health care industry majoring in health care-related fields.

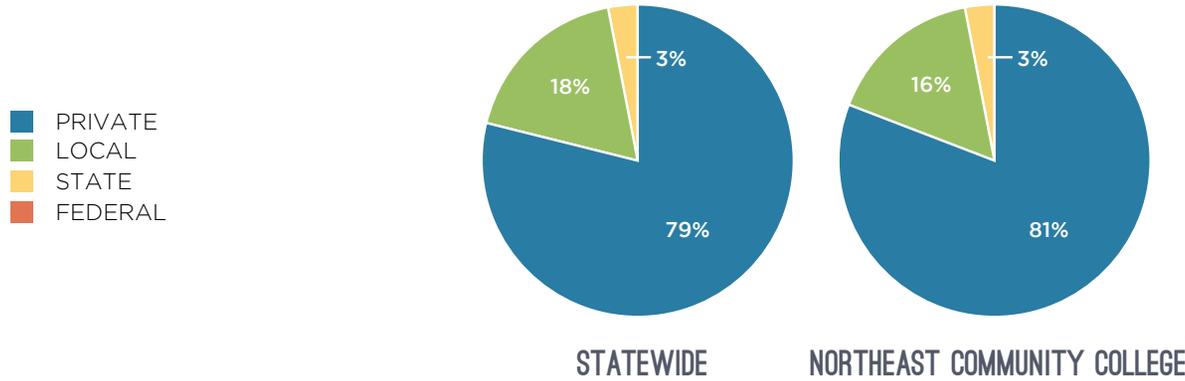

The most lucrative industry for Northeast graduates was utilities, with estimated average annual earnings of \$45,401. Graduates working in the leisure and hospitality industry received the lowest average annual wage of \$9,366. Eighty-nine percent of graduates working in the leisure and hospitality industry were female. The average annual salary for graduates working in retail trade was \$14,239.

Ninety-five percent of graduates employed in construction were male. Only 31% of graduates working in educational services majored in an education field.

# DEMOGRAPHIC ANALYSIS

Among all SCC graduates, 38.1 percent qualified as economically disadvantaged upon graduating. These graduates reported estimated average annual wages of \$26,112, not substantially different than the overall average. The median estimated annual earnings for Southeast graduates working in Nebraska was \$27,196. In general, minority graduates were less likely to be found working in Nebraska than their white counterparts. In general, females reported lower median wages than males. The less than one year degree level is an exception. Females earned median wages 1.4% higher than their male counterparts. Fifty-two percent of these females worked in the health care industry after graduating.

The health care industry employed 25.8% of Southeast graduates working in Nebraska. The median estimated average annual earnings for Southeast graduates working in Nebraska was \$27,196. Seventy-three percent of graduates employed in the finance and insurance industry were female. Sixty-two percent of graduates working in the educational services industry were 34 or younger. Over twenty percent, 23.3%, of minority graduates were employed in the health care industry. Graduates with degrees in business administration and management, general were found in all industries with the exception of accommodation and food services, mining, real estate and rental and leasing, and utilities. Seventy-four percent of graduates working in the health care industry majored in a health care-related field, while 15.5 percent of graduates who majored in health care-related fields were working in industries other than health care.

# BUSINESS SECTOR & SIZE ANALYSIS

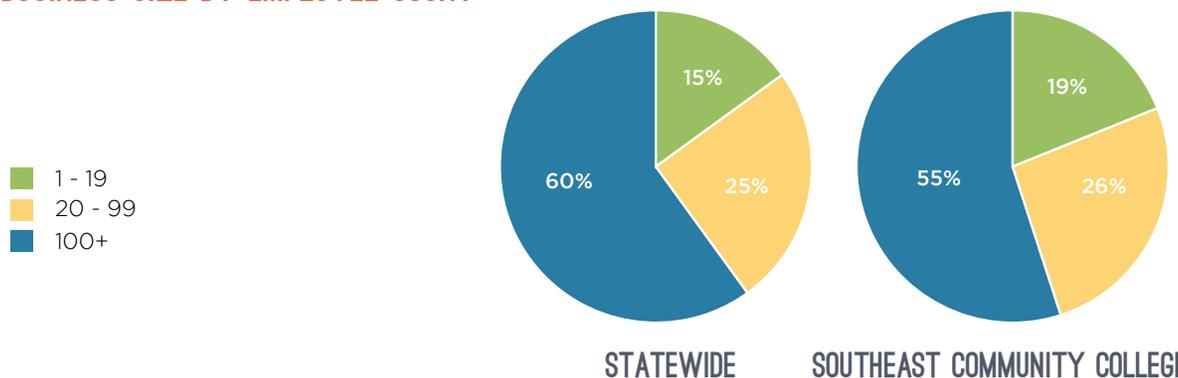

Ninety percent of Southeast Community College graduates found working in Nebraska were working for private companies, and 14.7 percent of graduates working for private companies earned less than \$11,500 annually. Those who earned between \$11,500 and \$20,500 made up 17.2 percent, 23.2% earned \$20,500 to \$28,500 and 45.0% earned more than \$28,500. Among Southeast graduates earning at least \$28,500, most (59.7%) worked for businesses that employed more than 100 people. In all, 52.1% of graduates that worked for private companies worked for employers that employed more than 100 people.

# DEMOGRAPHIC ANALYSIS

## ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

Minorities made up 12.8% of WNCC graduates, the same percentage as Nebraska’s minority population overall. The estimated average annual wage for white WNCC graduates was 19.4% higher than it was for minority graduates. The highest median annual wage of \$27,794 was earned by male graduates with a between one and two year award.

Eighty-six percent of WNCC graduates aged 25 and younger earned associate degrees, while 75.7% of WNCC graduates aged 26 and older earned associate degrees. The most popular field of study for male graduates was liberal arts and sciences/liberal studies (25.2%). It was also the most popular field of study for females (21.3%).

# INDUSTRY

## ANALYSIS

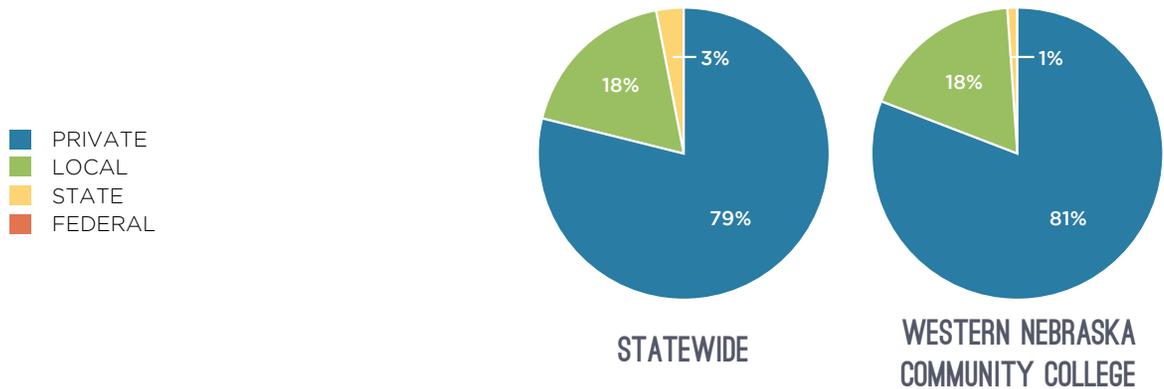

The health care industry employed 37.6% of WNCC Graduates and paid graduates the fourth-highest estimated average annual earnings among published industry results. The retail trade industry, the next largest industry, ranked by percentage of WNCC graduates employed, paid graduates estimated annual average earnings of \$22,663, slightly higher than the median for all WNCC graduates.

More than twice as many WNCC graduates were employed in the health care industry in the first quarter 2013 (59 graduates) than were employed by the next largest industry ranked by industry percentage (retail trade, with 24 graduates). Only 53.3% of graduates working in the educational services industry majored in an education-related field. The most common major of graduates working in the retail trade industry was liberal arts and sciences/liberal studies (33.3%).

The highest average annual wage was paid to state college graduates with a post-master's certificate in Superintendency and Educational System Administration. Their average annual salary was \$100,885. All graduates working in Nebraska with this degree were found to be working in the educational services industry.

Twenty-four percent of all state college graduates working in retail trade had bachelor's degrees in business administration and management. The average annual salary for these degree holders was \$29,412. Elementary education and teaching graduates made up 20.8% of all state college graduates working in the educational services industry. On average, they earned \$25,632. The industry with graduates earning the highest average annual wage was the utilities industry, at \$67,563. The industry with graduates earning the lowest average annual wage was leisure and hospitality, at \$15,138.

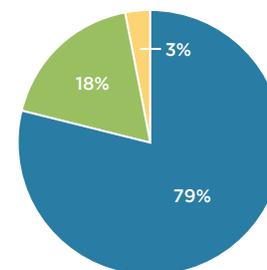

# BUSINESS SECTOR & SIZE

## ANALYSIS

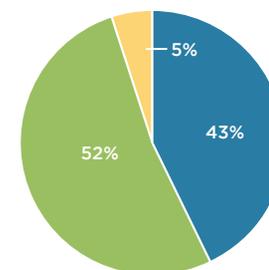

State college graduates worked in the local public sector 52% of the time, compared to the statewide average of 18%. Most of these graduates (90.2%) were found to be working in the educational services industry. Sixty-five percent of state college graduates worked for establishments that had 100 or more employees. A full 58% of these graduates were found to be working in the education services industry. Almost half (43%) of graduates found working in Nebraska worked for private companies. Retail trade was the industry in the private sector that employed the most state college graduates (18%). State college graduates working in the local sector earned the highest average annual wage, at \$38,097. Private sector employees made the least, at \$26,268.

Educational services was by far the most common industry for Peru graduates working in Nebraska, with 60.3% working in the field. Among those working in this field, 24.4% of graduates were male. Utilities was the highest paying industry for Peru graduates working in Nebraska (\$68,783); paying over \$11,000 more annually than the next best paying industry, management of companies and enterprises. The industry that paid the lowest average annual wage was arts, entertainment and recreation, at \$7,620.

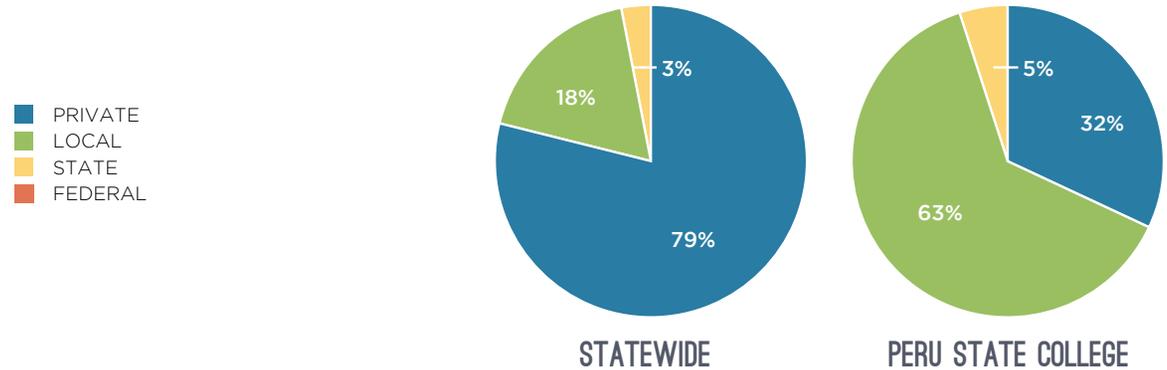

Only 41% of Peru graduates working in Nebraska majored in a field of study other than education and only 8% of graduates working in the educational services industry majored in a field of study other than education. After educational services, public administration was the most popular industry with Peru graduates, with 5.1% of Peru graduates working in Nebraska found working in the public administration industry.

# BUSINESS SECTOR & SIZE ANALYSIS

Given the high percentage of graduates working in the educational services industry, it is not surprising to find that 63.3% of Peru graduates were found to be working for local government. Of all Peru graduates working for local government, 90.2% were found to be working in the educational services industry.

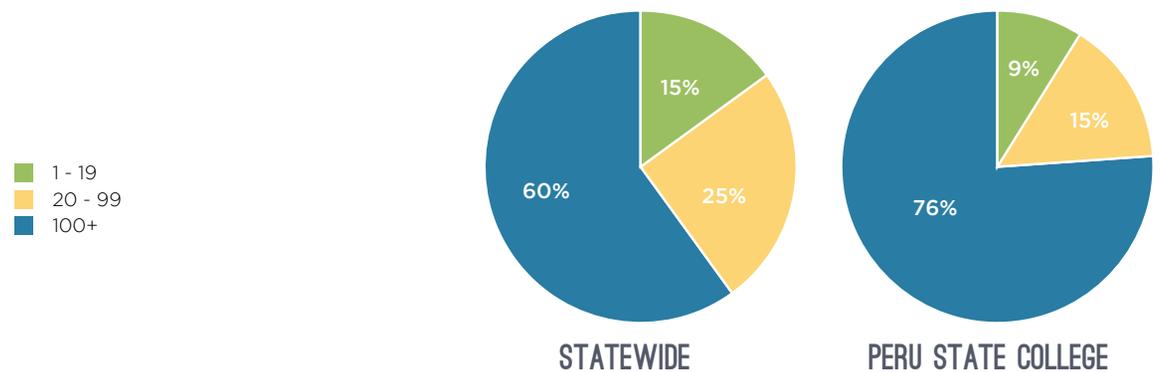

Among all Peru graduates working in the state, 76.5% worked for businesses or entities that had more than 100 employees. Again, it is not surprising to learn that 70.7% of graduates working for large entities were employed in the educational services industry. Concomitantly, far fewer recent Peru State College graduates worked for medium and small-sized employers than those other groups on a percentage basis.

## ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

Females outnumbered males at every degree level other than post master's certificates. They were also more likely to be found working in Nebraska after graduation. Minorities accounted for 4.5% of the graduating class and 2.2% of graduates earning master's degrees or higher. American Indian or Alaska Native graduates reported the estimated highest overall average annual wage.

The highest average annual wage earned by Wayne graduates was \$100,885, in the post master's certificate degree level. Graduates with a post master's certificate were also more likely to be found working in Nebraska than any other degree category. Among graduates between the ages of 35 and 44, 73.2% received a master's degree or higher. Graduates in this age group had an average annual wage of \$46,323. Overall, 26.5% of Wayne State graduates earned degrees or certification higher than a bachelor's degree. Their estimated average annual earnings were \$52,336.

# INDUSTRY

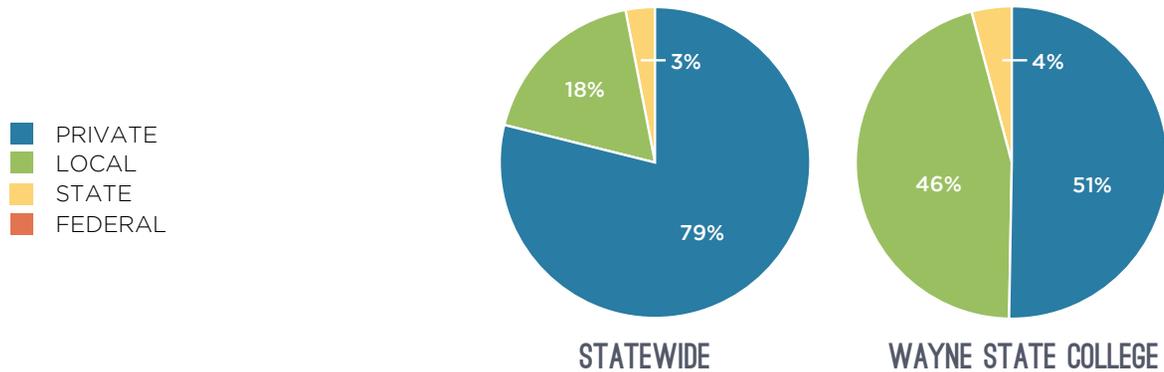

## ANALYSIS

The educational services industry employed the largest percentage (43.1%) of Wayne State graduates in the first quarter of 2013. It employed 194 graduates, more than four times more than the next largest employer ranked by percentage (retail trade with 43 graduates). The health care and educational services industries combined to employ 52% of Wayne State Graduates in the first quarter of 2013. The second most popular field of study for Wayne State graduates was curriculum and instruction (behind business administration and management), with 80 graduates. The largest industry percentage of employment for these graduates in the first quarter of 2013 was in educational services (61 graduates).

# BUSINESS SECTOR & SIZE ANALYSIS

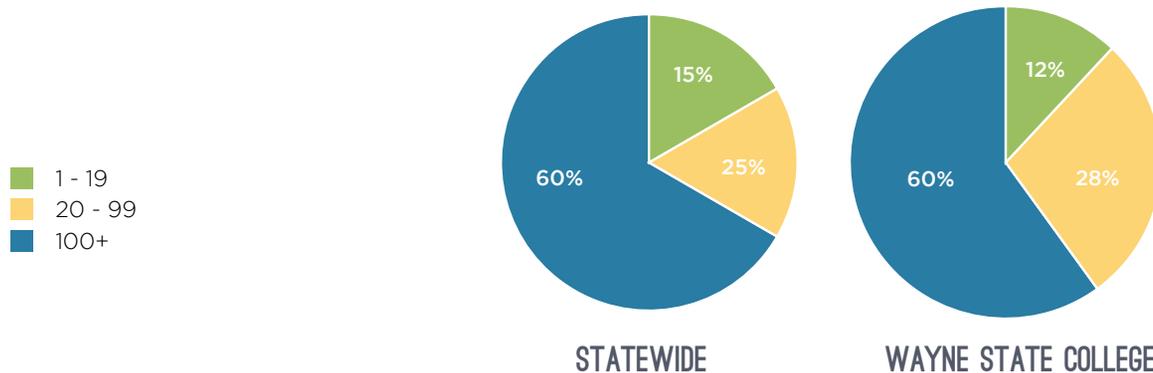

## GRADUATE EMPLOYMENT PERCENTAGE BY BUSINESS SECTOR

Unlike the pattern of other state schools, Wayne State College produced recent graduates who were more likely to be found working in private business and less likely to be working in the local government sector. Most graduates (60%) of Wayne State College worked for businesses with more than 100 employees. Of graduates working for large employers, 49.6% worked in the local government sector. Not surprisingly, 92.5% of these graduates worked in the educational services industry.

## NUMBER OF GRADUATES

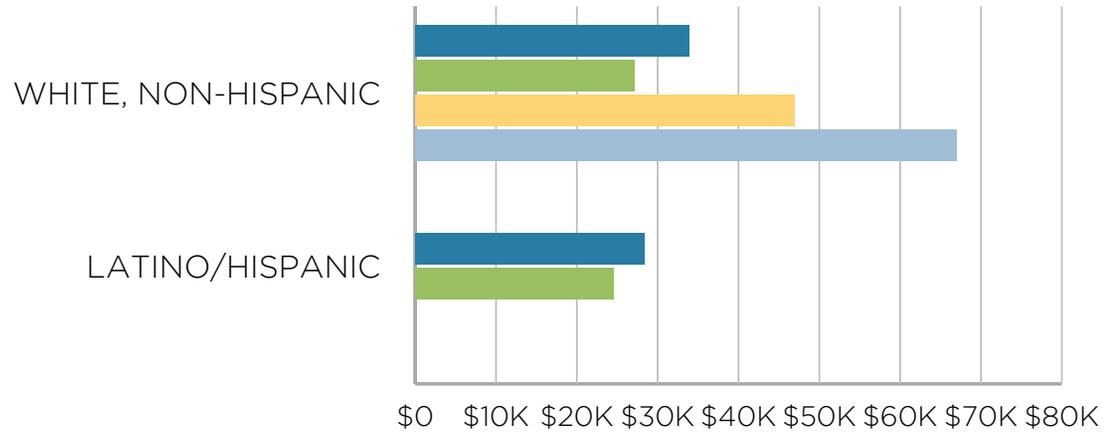

# DEMOGRAPHIC ANALYSIS

Five percent of all UNK graduates were minorities. Minorities constituted 5.4% of those graduating with a master’s degree or higher. More than twice as many females as males earned master’s degrees. Male graduates reported higher median wages than females at each degree level. Male graduates with a post master’s certificate earned the highest median annual wages of \$92,184. For all groups about whom economic data is disclosable, minorities earning master’s degrees were the group least apt to be found working in Nebraska.

Wholesale Trade	18	\$42,937

The wholesale trade industry had the highest estimated annual average earnings at \$42,937. The educational services industry employed the most UNK graduates at 43.7 % of UNK graduates found working in Nebraska. Female graduates were more likely than males to work in the industries of educational services (31.8% of females, 11.9% of males) and health care (6.9% of females, 1.6% of males). Male graduates were more likely to work in the wholesale trade industry (2.2% of males, 0.2% of females). The educational services industry employed 79.5% of graduates who earned more than a bachelor's degree from UNK and were found to be working in Nebraska.

# BUSINESS SECTOR & SIZE ANALYSIS

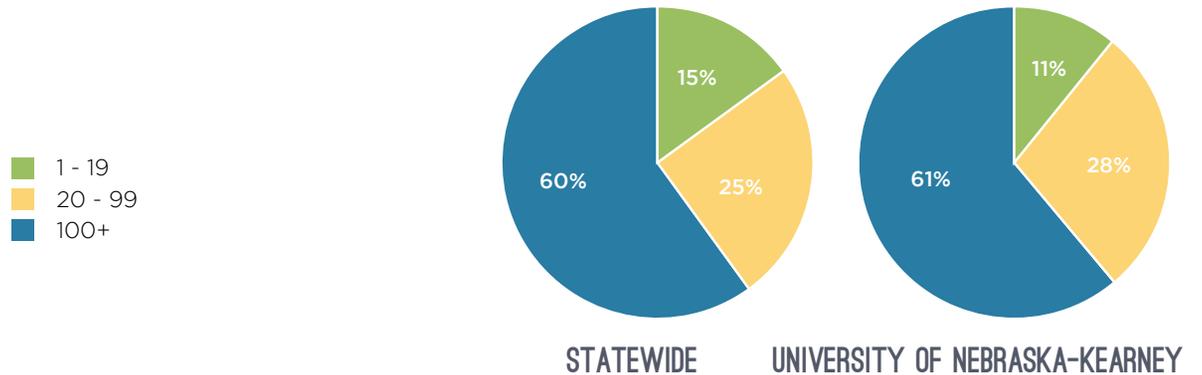

Just over half (50.4%) of recent UNK graduates were employed in the private sector. A similar percentage (43.2%) were employed in the local government sector. 37.9% of UNK's graduates majored in education-related fields of study. 17.4% graduated with majors in business. The major that earned the highest average annual wage was educational leadership and administration, general with average wages of \$55,978. 61.4% of UNK graduates worked for large businesses (more than 100 employees). Large firms also paid the highest average annual wage. 47.8% of graduates working for large firms were found to be working in local government. Among all large firms, local government paid the highest average annual wage of \$42,439. This is more than \$13,000 higher than the private industry average. Local government also paid the highest average annual wage among medium sized firms (20-99 employees). In this business size category, local government firms paid an average of \$39,162, more than \$11,000 more than private industry.
