GRADUATE OUTCOMES EXPLAINED

The Workforce Investment Act provided the impetus for the Graduate Outcomes project to develop a system of consumer information. This collaborative effort involves the Nebraska Department of Labor, the Coordinating Commission for Postsecondary Education, all six of Nebraska's community colleges, all three state colleges and the University of Nebraska - Kearney.

WHO USES GRADUATE OUTCOMES INFORMATION?

Prospective students planning their education need information to help select a college and major. Colleges and regulatory commissions need the information to improve educational programs in the state. Workforce Investment Boards, economic developers, and policy makers need information on labor supply to help meet the needs of businesses in Nebraska.

WHAT DOES THE GRADUATE OUTCOMES PROJECT TELL ME?

Results from the Graduate Outcomes project give a clear picture of recent graduates' work location, earnings, and industry employment.

HERE ARE JUST A FEW EXAMPLES OF QUESTIONS THE GRADUATE OUTCOMES PROJECT CAN HELP ANSWER:

- In which counties are graduates employed?
- What are the demographic characteristics of graduates?
- What industries employ recent graduates?
- Which fields of study produce graduates most likely to be employed in Nebraska?
- Which fields of study produce graduates with the highest wages?
- What are some characteristics of the businesses employing these recent graduates?

The Appendix of this publication contains detailed spreadsheets for participating institutions that include the percentage of graduates working in Nebraska plus earnings by field of study and degree. It also includes industry employment by major and degree along with earnings information.

4 [THINGS TO KNOW

Annualized wage records are found by taking the graduate's first quarter earnings multiplied by four. This is the same methodology used to estimate the service area earnings, using Quarterly Census of Employment and Wages data.

When there are small numbers of students in a program/major/industry, a few unusual results can dramatically affect percentages. To protect individual confidentiality, programs with fewer than four graduates are not published. Non-publishable or unavailable data is denoted as “***” or “na” throughout the publication.

Wage matches are postponed to give graduates time to be working in a career field. There is also a lag time in obtaining unemployment insurance records. In general, for people working January through March, employers have approximately April through June to report the information.

The Quarterly Census of Employment and Wage information is added July through September. Past experience tells us that if the queries are run at a later date, more employment is reported, allowing for more accurate and complete data.

Not all graduates can be found. If a graduate is not found, it does not necessarily mean they are unemployed; it means they were not located in the search of Nebraska's Unemployment Insurance database. Individuals who are self-employed, work in industries not covered by Unemployment Insurance, are enrolled in other postsecondary education and are not working, work in another state, or work for the federal government are unlikely to be found in the database. An institution's proximity to bordering states may make some students less likely to be employed in Nebraska, and therefore, not found in Nebraska's Unemployment Insurance database.

Earnings may be for full or part-time work. Earnings reported in the database include wages, salaries, bonuses, commissions and other income designated as earnings under Nebraska Unemployment law. Wages tend to be higher in some regions than others. The wage information listed relates to all individuals found working in Nebraska and may be influenced by strong regional variation.

It is not possible to tell if graduates are employed in occupations related to their education.

The CIP Code field identifies the six digit classification of instructional program (CIP) code for each field of study.

Data pertaining to the University of Nebraska-Lincoln and University of Nebraska-Omaha was not made available to the Nebraska Department of Labor for this publication.

DEMOGRAPHIC ANALYSIS

ESTIMATED AVERAGE ANNUAL WAGE BY RACE/ETHNICITY & DEGREE LEVEL

Eighty-five percent of all state college graduates with a post-master's certificate were found to be working in Nebraska, and earning a median annual income of \$96,015. Bachelor's degree holders from the state colleges earned a median income that was about 46% less than master's degree holders. Master's degree holders from the state colleges earned a median income that was about 50% less than post master's certificate holders. Sixty-nine percent of all state college students who received a post master's certificate were male. Eighty-six percent of all state college graduates were white, 2.0% were Hispanic, 1.7% were black, and less than 1 percent were American Indian, Alaskan Native, or Asian.

- ALL DEGREE LEVELS
- BACHELOR'S DEGREE
- MASTER'S DEGREE
- POST MASTER'S CERTIFICATE

If a color is not displayed on the graph, the data was not available for that race/ethnicity and degree level.

Estimated avg. annual wage data is not available for Asian, Native Hawaiian/Other Pacific Islander state college graduates or state graduates of two or more races. For complete breakdown of graph data, see the table on the previous page.

INDUSTRY

ANALYSIS

ALL STATE COLLEGES

The highest average annual wage was paid to state college graduates with a post-master's certificate in Superintendency and Educational System Administration. Their average annual salary was \$100,885. All graduates working in Nebraska with this degree were found to be working in the educational services industry.

Twenty-four percent of all state college graduates working in retail trade had bachelor's degrees in business administration and management. The average annual salary for these degree holders was \$29,412. Elementary education and teaching graduates made up 20.8% of all state college graduates working in the educational services industry. On average, they earned \$25,632. The industry with graduates earning the highest average annual wage was the utilities industry, at \$67,563. The industry with graduates earning the lowest average annual wage was leisure and hospitality, at \$15,138.

BUSINESS SECTOR & SIZE ANALYSIS

GRADUATE EMPLOYMENT PERCENTAGE BY BUSINESS SECTOR

State college graduates worked in the local public sector 52% of the time, compared to the statewide average of 18%. Most of these graduates (90.2%) were found to be working in the educational services industry. Sixty-five percent of state college graduates worked for establishments that had 100 or more employees. A full 58% of these graduates were found to be working in the education services industry. Almost half (43%) of graduates found working in Nebraska worked for private companies. Retail trade was the industry in the private sector that employed the most state college graduates (18%). State college graduates working in the local sector earned the highest average annual wage, at \$38,097. Private sector employees made the least, at \$26,268.

AGE ANALYSIS

ALL STATE COLLEGES

State college graduates tended to be a bit older than the average college graduate. Sixty-five percent of state college graduates were between the ages of 25 and 34, compared to the statewide average of 45%. Older graduates also tended to earn higher wages. Graduates ages 55 and over earned an average annual wage of \$47,040, the highest of all age groups. Educational services was the most popular industry within all age categories of state college graduates. Half (49.6%) of all state college graduates found working in Nebraska were employed in the educational services industry.

GRADUATE EMPLOYMENT BY COUNTY

NUMBER OF GRADUATES

DEMOGRAPHIC ANALYSIS

Females outnumbered males at every degree level other than post master's certificates. They were also more likely to be found working in Nebraska after graduation. Minorities accounted for 4.5% of the graduating class and 2.2% of graduates earning master's degrees or higher. American Indian or Alaska Native graduates reported the estimated highest overall average annual wage.

The highest average annual wage earned by Wayne graduates was \$100,885, in the post master's certificate degree level. Graduates with a post master's certificate were also more likely to be found working in Nebraska than any other degree category. Among graduates between the ages of 35 and 44, 73.2% received a master's degree or higher. Graduates in this age group had an average annual wage of \$46,323. Overall, 26.5% of Wayne State graduates earned degrees or certification higher than a bachelor's degree. Their estimated average annual earnings were \$52,336.

Wholesale Trade	17	\$22,863

The educational services industry employed the largest percentage (43.1%) of Wayne State graduates in the first quarter of 2013. It employed 194 graduates, more than four times more than the next largest employer ranked by percentage (retail trade with 43 graduates). The health care and educational services industries combined to employ 52% of Wayne State Graduates in the first quarter of 2013. The second most popular field of study for Wayne State graduates was curriculum and instruction (behind business administration and management), with 80 graduates. The largest industry percentage of employment for these graduates in the first quarter of 2013 was in educational services (61 graduates).

BUSINESS SECTOR & SIZE ANALYSIS

Unlike the pattern of other state schools, Wayne State College produced recent graduates who were more likely to be found working in private business and less likely to be working in the local government sector. Most graduates (60%) of Wayne State College worked for businesses with more than 100 employees. Of graduates working for large employers, 49.6% worked in the local government sector. Not surprisingly, 92.5% of these graduates worked in the educational services industry.
